

DC 12V DN20 CR01 2 Way Brass Motorized Valve Electrical Ball Valve

<https://www.banggood.com/DC-12V-DN20-CR01-2-Way-Brass-Motorized-Valve-Electrical-Ball-Valve-p-1098044.html?rmmds=myorder>

Description:

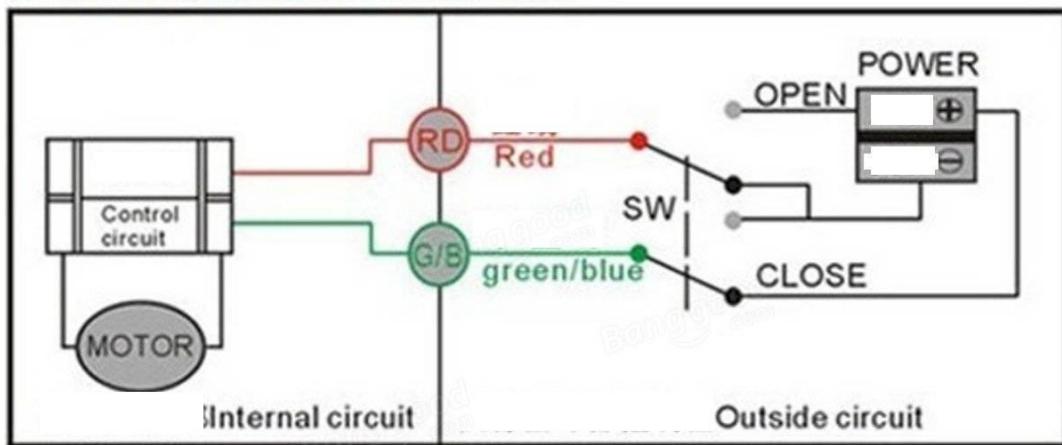

DC 12V DN20 CR01 2 Way Brass Motorized Valve Electrical Ball Valve

Specification:

Material	Copper, Stainless steel, PVC
Color	Blue+Brass
Pressure	0-1.0Mpa
Medium temperature	0°C < t < 90°C
Work voltage	DC12V
Input power	Max. 4W
Output torque	2N*M
Working current:	60-80mA
Nominal Size	DN20(reduce port)
Thread size	DN20(G3/4", BSP)

CR01 wiring Diagram (two wires)

1. Connecting SW and OPEN, the valve opens, getting the position, automatically power off, the valve remain fully open position.

2. Connecting SW and CLOSE, the valve close, getting the position, automatically power off, the valve remains side passes position (fully closed)

Features:

- Smart shape, Perform reliably, large output torque. multi-angle assembling, convenience for all kinds of requirements.
- Float ball design, no leak, most suitable for heavy dirt and long time no action.
- The conditions that solenoid valve can not be worked.
- High protection class, can be worked in moist conditions.

Application:

1. HVAC
2. Water treatment
3. Chemical process
4. Small equipment for automatic control
5. Replacing solenoid valve, particularly when solenoid cannot work reliably

Package Included:

- 1 x DC12V DN20 Ball Valve
